Melrose, Johannesburg  
**Investment:** R490 excl. VAT

## De-mystifying Bias in the workplace

In the end, it is about building gender partnerships, so that we can remove gender bias from our organisation and think about ourselves as a leadership community - instead of male and female leaders.

### Aims:

- Assist women to take ownership of their presence in the workplace
- Draw women into mindfulness about the ‘bias’ nature of the workplace and society
- Enable women to carve their own leadership path based on their own realities
- Enhance the collaborative nature and competitiveness of women for greater advancement and business growth
- Empower female leaders with practical tools on resilience and confidence
